

Food Reintroduction – Symptoms Tracker

Patient Name _____ Date _____

Reintroduce only one new food at a time. Eat it 2-3 times in the same day, stop eating it, then wait 48 hours to see if you have a reaction. Assess your response over that time, keeping track of your symptoms below. If there is no reaction to a food, you can keep that food in your food plan and continue with the next food for reintroduction. If you are unsure whether you had a reaction, retest the same food in the same manner. If you require more space, copy the blank chart for a second page.

	Day 1	Day 2	Day 3	Day 4
